RAINFALL DESCRIPTION GUIDE

These descriptions are presented as a guide only since many variables such as terrain, drainage and intensity can alter the descriptions.

2.5mm A light rain for 30-45 minutes, moderate rain for 10 minutes or heavy rain for 5 minutes. Small puddles would form but usually disappear after a short while.

5.0mm A light rain for 2-3 hours, moderate rain for 30-60 minutes or heavy rain for 15 minutes. Many puddles on the ground that do not disappear easily.

10.0mm A light rain never reaches this amount, moderate rain for 1-2 hours or heavy rain for 30-45 minutes. Deep standing water for long periods of time.

15.0mm Heavy rain for 1-2 hours – general saturation

20.0mm Very heavy rain for 1-2 hours

A weather vane with a dollar sign (\$) mounted on top, set against a blue sky with light clouds. The vane has four directional arms with arrowheads. The text is overlaid on the image.
